

How to reverse the 'guilty' verdict

Upholding autonomy and beneficence in research priority setting exercises in Ghana

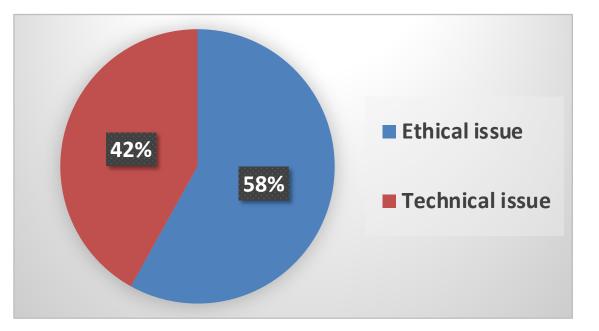

Benedict Weobong, School of Public Health, University of Ghana

#### An ethical imperative; not just a technical issue!

# The numbers do not lie....!

**Priority setting** occurs any time someone <u>makes a decision</u> or recommendation about how to allocate a **scarce resource** 

# A matter of s/he who pays the piper....!

# Concerns with disparities in [Mental Health] research investments...

Under-funded

Vulnerable

**Ethical imperative** 

# Protecting a good cause

Pursuing an ethical imperative- Upholding autonomy and beneficence in research priority setting exercises in Ghana.

#### Aim

To identify mental health and disability research priorities for Ghana within the context of the prevailing research ecosystem
